

Superior Autoworks

By

Denk

Superior Autoworks is an owner-operator business that specializes in building award winning automobiles and antique fire trucks. We work closely with our customers and strive to produce the highest quality of detail and workmanship beyond their expectations. Whether your interests are antiques, full or semi customs, corvettes, street rods or 100% stock concourse restoration work, our goal is to please the customer.

We specialize in complete frame-off restorations that are completed with the highest level of research and detail. We complete 95% of your restoration work-in-house. By keeping your project in our shop from start to finish, we are able to organize and control the entire project every step of the way.

We have been very successful in creating show winning vehicles and satisfied customers. Part of our success is from keeping no more than three vehicles under construction at a time. This allows us to stay focused and organized and eliminates customer frustration. Another part of our success comes from communication with our customer throughout the entire project. The final part of our success comes from pride in our workmanship.

If you are interested in competing and being judged at the AACA, NCRS, NCCC, ISCA, NMCA or Good Guys level, we can build you a winner. Our work has been recognized by some of the leading magazines and books that

deal with the auto restoration industry. Many of our vehicles have been featured in magazines and have competed across the nation and have achieved the highest honors in all competitive categories.

Thank you for checking us out! Do not let the project become a nightmare. Give us a call and we can talk about building your dream!
